Project Work:

1. Chat-App

Description: A real-time messaging platform with support for text, media sharing, and social media integration. Built for secure and seamless communication across devices.

Technology: React.js, Socket.io, Node.js, Redux Toolkit, MongoDB, GitHub, express

Programming Language: HTML, CSS , JavaScript

GitHub Link: <https://github.com/asif-ansari10/Chat-App>

Freelance Project:

1. Trading Portfolio Manager

Description: A full-stack trading portfolio management application designed to help users track investments, monitor profits/losses, and manage trading activities efficiently. Developed responsive dashboards, portfolio analytics, and secure data handling features to improve user experience and financial tracking.

Role: Lead Developer

Tech Stack: Next.js, App Router , Node.js, MongoDB.

Live Demo: <https://www.tradingportfoliomanager.online>

2. RentFlow – Property Rental Management System

Description: Developed a complete rental management platform for landlords and property owners to manage tenants, rent payments, agreements, and property records. Implemented real-time rent tracking, tenant management, and responsive dashboards for better property operations.

Role: Lead Developer

Tech Stack: Next.js, App Router , Node.js, MongoDB.

Live Demo: <https://www.rentflow.co.in>

3. CodeMeet – Coding Arena & Event Platform (Pandora Softwares)

Description: Built a coding competition and event management platform similar to Unstop, allowing users to register for coding contests, explore events, and participate in technical activities. Focused on responsive UI, authentication flow, and scalable frontend architecture.

Role: Lead Developer

Tech Stack: React.js, Node.js, Express, Firebase.

GitHub: <https://github.com/asif-ansari10/CodeMeet-Coding-Arena>

4. VisaNauta – Canadian Immigration Marketplace Platform

Description: Worked on a real-world Canadian immigration platform focused on automating and simplifying immigration practice management. Contributed to developing production-ready features, handling client requirements, improving user workflows, and building scalable frontend modules for a SaaS-based marketplace solution.

Role: Lead Developer

Tech Stack: Next.js, Node.js, Express, Supabase, Stripe Payment, OAuth2.0.

Live Project: <https://www.visanauta.com>

Experience:

- **Internship Title:** Software Developer Intern July 2024 – September 2024
- **Company:** Unified Mentor Private Limited
- **Personal Project:** Chat-App
- **GitHub Link:** <https://github.com/asif-ansari10/Chat-App>
- **Job Title:** Freelancing November 2024 – Present
- **Platform:** Upwork , LinkedIn
